As at September 30, 2026, consolidated assets of APC Group, Inc. and its subsidiaries (the Group) amounted to ₱253.1M million, ₱1.3 million (1%) lower compared to the December 31, 2025 balance of ₱254.4 million.

- Cash decreased primarily due to several payments totaling ₱1.5 million for various general and administrative (G&A) expenses, P0.7 million for the prior year's audit fee, and P2.5 million for exploration costs related to preparatory activities for the upcoming project in Ginatilan, Cebu. These cash outflows were partially offset by ₱0.4 million in interest income from bank deposits and other income.

The Group's consolidated liabilities amounted to ₱111.2 million. The movement in this account pertains to the accrual of charges related to preparatory activities for the upcoming project in Ginatilan, Cebu.

Total equity as at September 30, 2026 and December 31, 2025 amounted to ₱142.0 million and ₱144.7 million, respectively. The decrease, amounting to ₱2.7 million, is attributable to the net loss obtained during the period.

There were no off-balance sheet transactions.

The Group ended the third quarter of 2026 with a net loss of ₱2.7 million, higher than the net loss reported in the same period in 2025. The increase in net loss was primarily due to lower interest income from bank deposits, lower other income, and higher operating expenses resulting from the renewal of the Group's life insurance plan.

As at September 30, 2026, except for what has been noted in the preceding, there were no material events or uncertainties known to management that had a material impact on past performance, or that would have a material impact on the future operations, in respect of the following:

- Known trends, demands, commitments, events or uncertainties that would have a material impact on the Group;
- Material commitments for capital expenditures that are reasonably expected to have a material impact on the Group's short-term or long-term liquidity;
- Known trends, events or uncertainties that have had or that are reasonably expected to have a material favorable or unfavorable impact on net sales/revenues/income from continuing operations;
- Significant elements of income or loss that did not arise from the Group's continuing operations;
- Seasonal aspects that had a material impact on the Group's results of operations; and
- Material changes in the financial statements of the Group for the periods ended September 30, 2026 and September 30, 2025, except those mentioned above.

KEY PERFORMANCE INDICATORS

Management uses the following key performance indicators to evaluate the performance of the Group. Except for Net Income, these key performance indicators are not measurements in accordance with Philippine Financial Reporting Standards (PFRS) and should not be considered as an alternative to net income or any other measure of performance which are in accordance with PFRS.

1. **Return on Assets Ratio (ROA).** Return on Assets is an indicator of how profitable a company is relative to its total assets. ROA gives an idea as to how efficient management is at using its assets to generate earnings and is calculated by dividing the Group's annual earnings by its total assets.

2. **Return on Equity Ratio (ROE).** Return on Equity measures how much profit is generated with the money shareholders have invested in the Company. It is expressed as a percentage and calculated by dividing net income by total Stockholders' Equity.

3. **Current Ratio.** Current ratio is computed by dividing current assets by current liabilities. This indicates the liquidity of the Group in the short term and measures the peso amount of current asset available to cover a peso amount of current liability.

4. **Debt-to-Equity Ratio (DER).** DER gives an indication of the Group's leverage position and is computed by dividing total liabilities with total stockholders' equity.

5. **Asset-to-Equity Ratio (AER).** Asset-to-Equity Ratio is computed using total assets divided by the total stockholders' equity. This ratio shows the relationship of the total assets of the firm owned by shareholders and an indicator of the leverage used to finance the Group.

The table below shows the comparative figures of the key performance indicators for the period in review.

2. RISK EXPOSURES

Financial Risk Management

The Group has risk management policies that systematically view the risks that could prevent the Group from achieving its objectives. These policies are intended to manage risks identified in such a way that opportunities to deliver the Group's objectives are achieved. The Group's risk management takes place in the context of day-to-day operations and normal business processes such as strategic planning and business planning. It is also established to identify and manage the Group's exposure to financial risks, to set appropriate transaction limits and controls, and to monitor and assess risks and compliance to internal control policies.

Management has identified each risk and is responsible for coordinating and continuously improving risk strategies, processes and measures in accordance with the established business objectives. The BOD has overall responsibility for the establishment and oversight of the Group's risk management framework. Risk management policies and structure are reviewed regularly to reflect changes in market conditions and the activities of the Group.

The Group's principal financial instruments comprise of cash and cash equivalents, receivables, security deposits, trade and other payables (excluding statutory payables), and advances from a related party.

The main risks arising from the Group's financial instruments are credit risk, liquidity risk and interest rate risk. The BOD reviews and approves policies for managing these risks. These are summarized below.

Credit Risk

Credit risk is the risk that the obligations of the Group will not be repaid on time and in full as contracted, resulting in a financial loss. It is inherent to the business as potential losses may arise due to the failure of its counter parties to fulfill their obligations on maturity dates or due to adverse market conditions.

Generally, the credit risk of the Group is attributable to financial assets at amortized cost. The Group maintains credit policies and continuously monitors defaults of counter parties, identified either individually or by group, and incorporate this information into its credit risk controls. Managing credit risk has both qualitative and quantitative aspects. Credit officers must evaluate the credit quality of the counterparties and assign internal credit ratings upon this evaluation.

The Group defines credit exposure as all transactions where losses might occur due to the fact that counterparties may not fulfill their contractual payment obligations based on original contractual terms. The Group's exposure to credit risk arises from default of the counterparty, with a maximum exposure equal to the carrying amounts of these financial assets. Credit risk from cash in banks is mitigated by transacting only with reputable banks duly approved by management.

Liquidity Risk

Liquidity risk is the risk that the Group will not be able to meet its financial obligations as they fall due. The Group's objectives to managing liquidity risk is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking adverse effect to the Group's credit standing.

The Group seeks to manage its liquid funds through cash planning on a weekly basis. As part of its liquidity risk management, the Group regularly evaluates its projected and actual cash flows. It also continuously assesses conditions in the financial markets for opportunities to pursue fund raising activities.
